## ABOUT ME

A proactive Software Engineering student driven by curiosity, continuous learning, and a passion for problem-solving. Adaptable and collaborative, I enjoy exploring innovative ideas and challenging assumptions to build effective, creative solutions.

## EDUCATION

Jan 2023 - June 2026

### Nanjing Tech University of China, Nanjing

- Bachelor of Technology in Computer Science
- Major GPA 3,34
- Dean's list (2022-2023; 2023-2024)

## EXPERIENCE

### Perhimpunan Pelajar Indonesia di Tiongkok (PPIT Nanjing)

Aug 2022 - Aug 2023

- Supported the organization of social and cultural events for 400+ Indonesian students, fostering community engagement.
- Created multimedia content and promotional materials to enhance event communication and participation.

### Private Tutor

Sep 2017 - Oct 2020

For junior and high school students

- Provided personalized tutoring in Mathematics, Chemistry, and English for junior and senior high school students.
- Developed lesson materials aligned with school standards, helping students improve their academic performance.

## PROJECTS

### Coffee Ordering App

May 2025

- Successfully deployed a fully functional ordering system, integrating a modern UI with a dynamic, multi-tier customization workflow.
- Enhanced data integrity and system speed by implementing a secure backend capable of handling real-time user preferences and instant order updates.

### Compiler Project

May 2025

- Engineered a functional compiler core by successfully implementing tokenization, parsing, and syntax analysis to translate source code into intermediate representation.
- Designed an interactive GUI featuring real-time syntax feedback and color-coded token rendering to streamline the code debugging process.
- Optimized user workflow by integrating live parsing visualization and automated export functionality for processed code.

### Full-Stack Web Application

January 2025

- Architected and deployed a production-ready application end-to-end with responsive UI, secure authentication, RESTful APIs, and database CRUD operations.
- Managed deployment and live monitoring, delivering a stable platform actively serving real users.

### Inventory Management Store App

February 2026

- Engineered an end-to-end store inventory system to streamline stock tracking, database management, and daily operational workflows.
- Integrated secure RESTful APIs and authentication, deploying the app on live hosting with active system monitoring.

### Full-Stack Web

July 2026

Designed and developed a responsive personal portfolio from scratch to showcase engineering projects, technical skills, and professional accomplishments.

**Programing Skills :** Pyhton, Java, C++,C#, HTML, CSS, React.js, MySQL, SQLite, Android Studio.

**Language Skill :** English, Bahasa Indonesia, Chinese (Simplified)
